Test and Measurement Solutions

## TEXIO

## INTRODUCTION

The products described in the TEXIO General Catalog are listed in a separate selection guide, which classify the products according to the instrument types and groups, and shows the features and specifications of each. Please use this catalog as a guide when ordering.

- All of the products listed in this catalog may not be marketed in your local area or country. Please check with your TEXIO distributor or send an inquiry to us through our web-site, http://www.texio.co.jp .
- Readers are able to learn about new products released after the publication of this catalog through your TEXIO distributor or dealer. We are able to also provide you with new product information on our web-site.
- The design and specifications of the products listed in this catalog are subject to change without prior notice. In addition, please note that some of the products may be discontinued without prior notice.
- For product prices and available services, please contact your local TEXIO dealer.
* In producing this catalog we have made maximum efforts to provide as correct information as possible. However, should you find any misprints or errors, please let us know.

## TEXIO...

## Providing Industry with the Most Valuable Measurement Technology.

Nowadays, new products featuring high-tech advances appear in dizzying succession. As we head toward a new age in technology, advances in electronics-oriented leading-edge fields in particular continue to accelerate. Supporting this new wave of the technical revolution from the bottom up is electronic measurement technology. TEXIO's initial technological and industrial triumphs were in the field of general purpose measurement equipments for audio manufacturers. Following those first successes, TEXIO went on to develop multiple-output Regulated DC Power Supplies for electric engineers in rapid succession. Those developments led in turn to develop various Regulated DC Power Supplies and Test and Measuring Instruments. In a constant pursuit of better performance and quality for its products, which are the pride of those ages, TEXIO has made continuous and solid progress in the area of measurement technology. Indeed, we could say that TEXIO's advances in product development technology resulted from the evolution of measurement technology. Electronic measurement technology of this sort has consistently supported and equipment made their way to the market as TEXIO moved forward. That is the main reason why TEXIO has continued to lead the market in these leading-edge fields. Never content to rest on its laurels, TEXIO draws on its hi-tech achievements to introduce technology using advanced technology, all the while working steadily to open up new fields of endeavor. "Technological evolution and the technology to support it"The geometric effect accruing from this combination has become the foundation for TEXIO's outstanding creativity and far-sightedness.
TEXIO considers "superior precision and superior quality" as essential to ongoing progress. Relying on a foundation of precision measurement technology, outstanding technical know-how and quick response to developments in leading-edge technology, TEXIO continues to make major contributions in many fields toward technical advances, superior reliability and rationalization by providing the "mother tools" of industry. Proud of its achievements, TEXIO will redouble its efforts to remain a trailblazer in the field of leading-edge electronic technology.

## Corporate Profile

| Company name | TEXIOTECHNOLOGY CORPORATION |
| :---: | :---: |
| Founded | October 2012 |
| Capital | J. Yen 90 million |
| President | Tsung-Huei Teng (Mr.) |
| Holding company | GOOD WILL INSTRUMENT CO., LTD. |
| Business categories | Test and Measuring Instruments and DC Power Supplies design, development, manufacturing and distribution |
| Products | Regulated DC Power Supplies, Electronic Loads, Oscilloscopes, Electronic measurement devices and others |
| Employees | 44 (as of April 2020) |
| Transaction bank | Sumitomo Mitsui Banking Corporation MUFGBank, Ltd. |
| Headquarters | 7F Towa Fudosan Shin Yokohama Bldg., 2-18-13 Shin Yokohama, Kohoku-ku, Yokohama, Kanagawa, 222-0033 Japan TEL +81(0)45-620-2305 FAX +81(0)45-534-7181 |

## History

$1954 \quad$ Produced 1st measurement device SG-1/RS-1 (Kasuga Musen)
1965 Developed 1st oscilloscope CO-130 (TRIO)
1973 Developed regulated DC power supply PR-601/PR602 (TRIO)
$1988 \quad$ Developed digital storage oscilloscope CS-8010 (Kenwood)
1989 Developed multiple-output regulated DC power supply PW series (Kenwood)
1992 Developed switching power supply PS series (Kenwood)
$1996 \quad$ Established Kenwood TMI Corporation.
1999 Developed Electronic load device PEL-201 series (Kenwood)
2002 Nikke group acquires 100\% of shares, became part of Nikke Group
2006 Developed flexible range regulated DC power supply PSF-L series (Kenwood)
Changed name to Texio Corportion.
2009 Nikke regrouped subsidiary companies and establised Nikke Techno System Co., Ltd. TEXIO was incorporated into the company as TEXIO division.
2012 Developed Electronic load LSA series (TEXIO)
GOOD WILL INSTRUMENT CO., LTD took over TEXIO division of Nikke Techno System and established TEXIO TECHNOLOGY CORPORATION.
Developed hybrid method regulated DC power supply PDS-A series. (TEXIO)
2014 TEXIO TECHNOLOGY CORPORATION merged with INSTEK JAPAN CORPORATION on January.
2015 Developed Digital Storage Oscilloscope DCS-2000E Series. (TEXIO)
Developed Programmable AC power source APS-7000 Series.(GW)
2016 Developed Arbitray function generator AFG-303x Series.(GW)
2017 Developed Power meter GPM-8213.(GW)
2018 Developed Digital Storage Oscilloscope MDO-2000E Series.(GW)
Developed Multi-Range D.C. Power Supply PFR-100 Series.(TEXIO)
2019 Developed Digital Multimeter GDM-906x Series.(GW)
Developed High voltage Electronic Load LSG-H Series.(TEXIO)
Developed multiple-output regulated DC power supply GPP series(GW)

*G Type: With GP-IB/LAN interface

## PFR Series

Multi-Range Operation

Test mode Function
The test mode is a function to automatically update voltage and current settings according to the time. The setting creates a CSV file on the PC and loads it into PFR using the USB flash drive, so it can use it without difficult operation..

## PSF-400H (800V/3A/400W) <br> PSF-800H (800V/6A/800W)

- Main Applications

High-voltage capacitors or relays used for hybrid cars, electric cars, solar power system and high-voltage LED lighting equipment.

- 6 times of flexible output range

PSF-800H covers output for several units of conventional type regulated power supplies within 800 W ( max voltage 800 V , max current 6A. ).

- Constant Power Control

CP mode is available in addition to CV and CC modes.

- Changeable setting style

Vertical or horizontal setting by $90^{\circ}$ rotating panel.

- Sequence Operation

Stand-alone sequence is available with the insidememory programmed by PC, through the optional control board (IF-60GP, IF-60RU).

- Master-slave parallel operation

Possible to increase the output current by master-slave parallel connection of the same model (up to 2 units).

- Various functions are available

Output OFF timer, 3-point preset memory, Remote sensing, External analog control, OVP/OCP/OHP protections

PSF-H Series

## Flexible range

Regulated DC Power Supplies

PSF-400L (80V/40A/400W)<br>PSF-800L (80V/80A/800W)<br>PSF-400L2 (80V/40A/400W x 2)<br>PSF-800LS (80V/80A/800W) (Slave Model)<br>PSF-1200L (80V/120A/1200W)<br>PSF-1600L (80V/160A/1600W)

- Flexible output range

Possible to output voltage and current flexibly within the rating power. In case of PSF- $800 \mathrm{~L}, 10 \mathrm{~V} / 80 \mathrm{~A}$ to $80 \mathrm{~V} / 10 \mathrm{~A}, 20 \mathrm{~V} / 40 \mathrm{~A}$ to $40 \mathrm{~V} / 20 \mathrm{~A}$, etc. are available corresponding to plural number of conventional regulated DC power supplies.

- $90^{\circ}$ rotating panel operation part
$90^{\circ}$ rotating panel installs the unit vertically or horizontally.
- Sequence function

Stand alone sequence operation is possible sending the sequence made with PC to the unit through optional IF-60GP or IF-60RU interface board.

- Control of constant power

In addition to constant voltage(CV) and constant current(CC), constant power(CP) is also available for use of supplying arbitrary power or as limit function to protect being added over power to load side.

## PSF-L Series

## $90^{\circ}$ Rotating Panel

- External control

Output voltage and current can be set through external voltage or PSF-L Series external resister, and to control output on/off by external contact signal.

- Application software for making sequence program can be downloaded from our website.
- Others

Off timer function, 3-point preset function, monitor out function (voltage, current and status), protection function, delay function (PSF-400L2 only), and tracking function (PSF-400L2 only).
-Parallel/series operation
Including master unit, 4 units in parallel and 2 units in series connection can be controlled by one master unit. Current expansion model(exclusive slave unit) in parallel connection is available.
 (using OP-21A)

Vertical installation (using OP-21B)

PSF-400L/800L + PSF-800LS

- Four digits LED display

The high resolution display can indicate output voltage and current and power value. Voltage and current values can be easy to set with "digit key" by selecting a digit to be changed.

- Three points preset memory function

Possible to preset three kinds of voltage and current values inside for easy reading of setting values.

- HI-R Function

This function is useful for not to discharge secondary cell, not to ungild plating and so on.

- Off timer function

Possible to turn off output automatically after a lapse of preset time.

- Controlling transient build-up current function

This function enables to control current at output on and prevents current overshoot.

- Sequence function

Stand-alone sequence operation is possible by loading maximum 1000 steps sequence program from PC into the unit through optional IF-70GU or IF-7ORS interface board.

- Master slave operation

This function enable to operate plural same units in parallel up to 2400 W (up to 800 W for 6 V series) and in series for two units.

## PS-A / PS-AR Series

## Switching

- External analog control (PS-A type only)

The PS-A series can be controlled by external voltage or resistance for setting voltage and current values and by external contact for turning on/off output and selecting preset memory. PS-AR type dose not accommodate external analog control.
Optional remote control interface boards
IF-70GU (GP-IB and USB), IF-71RS (RS-232C) and IF-70PS (compatible with PS series) are available.
RS-232C standard PS-AR type
PS-AR type is included RS-232C control board. PS-AR type can connect max. 32 units and be controlled by PC. Simple and low-cost system can be provided.

* GP-IB or USB connection needs to install IF-70GU into the 1st unit (instead of RS-232C interface board).

|  | PS-AR Type |  |
| :--- | :--- | :--- |
| External analog control | N/A | Standard equipment |
| RS-232C control | IF-70RS is enclosed. ${ }^{*}$ | Option (IF-70RS) |
| GP-IB control | Option (IF-70GU) | Option (IF-70GU) |
| USB control | Option (IF-70GU) | Option (IF-70GU) |

* IF-7ORS enclosed to PS-AR must be installed before using PS-AR.

As compared with dropper-method DC power supplies, the unique switching and dropper circuit systems bring low output noise at same level, light weight less than half, and compact body. PDS-A power supply corresponds to EU RoHS regulation in consideration of environment. GP-IB, RS-232C, USB and LAN optional control boards are available and users are able to download API and drivers software from TEXIO web-site.

Specifications

## PDS-A Series

Low ripple / noise
$0.5 \mathrm{mVrms}(30 \mathrm{mVp}-\mathrm{p})$ same as dropper method

Comparing Ripple/ Noise (output: rated 36V/ 10A)
High speed transient response at $100 \mu \mathrm{~s}$ (typ)
(Approx. 1 ms for switching method power supplies)

Comparing transient response
Compared to Dropper method PD18-20AD

* Compact size

Max. over 50\% downsized compared with PD-AD series

* Light weight

- One-Dial Control

All setting conditions are selected at the single rotary-encoder.

- Tracking

Output voltage and current value of positive and negative can be adjusted
from zero at the same time by the absolute value tracking.
4-Point Pair Presetting of Voltage and Current Value

- ON/OFF Delay Time

Delay-time can be set in each output.

- Output Selection

On and off of each output can be selected and set besides the main output key.

- Key Lock

A key lock function provides to hold all setting values except for power switch.
Limit \& Status Key
The output voltage and current values can be confirmed by the limit-key. The trucking of each output and the condition of delay setting can be confirmed by the status-key.

- Various External Controls

ON/OFF of main output, PRESET 1 to 4 and alarm.

- Overheating Protection
- GP-IB, USB, RS-232C

GP-IB/USB inter face card (IF-41GU),USB inter face card (IF-41USB) and RS-232C

PAR36-3A (36V/3A)
Built-in microprocessor Remote sensing
CV/CC power supply Rack-mount size
O Key Lock Limit Key
- GP-IB, USB, RS-232C
GP-IB/USB interface card (IF-41GU), USB interface card (IF-41USB) and RS-232C card (IF-41RS) provided as user option.
```

## PAR-A Series

## Remote Sensing

Specifications

| Model | Output (Voltage, Current) | Ripple |  | Line regulation |  | Load regulation |  | Dimensions W×HxD(mm) | Max dimensions W×HxD(mm) | Power consumption W/VA(approx.) | Weight kg (approx.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\mathrm{CV}(\mathrm{mV}$ ms) | CC(mArms) | cV(mV) | CC(mA) | CV(mV) | CC(mA) |  |  |  |  |
| PAR18-6A | $0 \mathrm{~V}-18 \mathrm{~V}, 0 \mathrm{~A}-6 \mathrm{~A}$ | 0.5 | 2 | 1 | 2 | 2 | 5 | $138 \times 124 \times 380$ | $140 \times 148 \times 403$ | 213W/278VA | 9.1 |
| PAR36-3A | $0 \mathrm{~V}-36 \mathrm{~V}, 0 \mathrm{~A}-3 \mathrm{~A}$ | 0.5 | 2 | 1 | 2 | 2 | 5 | $138 \times 124 \times 380$ | $140 \times 148 \times 403$ | 189W/255VA | 9.1 |

Setting Resolution
Voltage: 1 mV ( $10 \mathrm{mV}:+16 \mathrm{~V},+/-18 \mathrm{~V},+/-24 \mathrm{~V},+/-26 \mathrm{~V},+/-36 \mathrm{~V})$
Current: 1 mA

Remote Sensing function
Remote Sensing function can compensate voltage drop caused by cable impedance.
PW26-1ATS, PW18-1.3ATS ,PW8-5ADPS and PAR-A series only.

Options

| IF-41GU | GP-IB/USB interface board |
| :--- | :--- |
| IF-41RS | RS-232C interface board |
| IF-41USB | USB interface board |
| TA-66 | D-sub 9pin - Monular connector changer |
| CB-2420P | GP-IB cable |

| CB-0603S | Modular cable $(0.3 \mathrm{~m})$ |
| :--- | :--- |
| CB-0615S | Modular cable $(1.5 \mathrm{~m})$ |
| CB-0630S | Modular cable $(3.0 \mathrm{~m})$ |
| CB-06100S | Modular cable $(10 \mathrm{~m})$ |
|  |  |

## Regulated DC Power Supplies

| PA10-5B | $(10 \mathrm{~V} / 5 \mathrm{~A})$ | PA80-1B | $(80 \mathrm{~V} / 1 \mathrm{~A})$ |
| :--- | :---: | :--- | :--- |
| PA 18-1.2BVT $(18 \mathrm{~V} / 1.2 \mathrm{~A})$ | PA 120-0.6B | $(120 \mathrm{~V} / 0.6 \mathrm{~A})$ |  |
| PA18-2BVT | $(18 \mathrm{~V} / 2 \mathrm{~A})$ | PA160-0.4B | $(160 \mathrm{~V} / 0.4 \mathrm{~A})$ |
| PA18-3B | $(18 \mathrm{~V} / 3 \mathrm{~A})$ | PA250-0.25B | $(250 \mathrm{~V} / 0.25 \mathrm{~A})$ |

Options

| GP-600B | GP-IB adapter |
| :--- | :--- |
| OP-18-PAB | Connection cable between PA-B and GP-600B (1pcs) |
| OP-20GC | Front output terminal guard cap (2pcs) |

## GP-600B

GP-IB Adapter for PA-B Series Power Supplies

## DC Electronic Loads

| LSG-175 | $(150 \mathrm{~V} / 35 \mathrm{~A} / 175 \mathrm{~W})$ |
| :--- | :--- |
| LSG-350 | $(150 \mathrm{~V} / 70 \mathrm{~A} / 350 \mathrm{~W})$ |
| LSG-1050 | $(150 \mathrm{~V} / 210 \mathrm{~A} / 1050 \mathrm{~W})$ |
| LSG-2100S | $(150 \mathrm{~V} / 420 \mathrm{~A} / 2100 \mathrm{~W})$ (Booster for LSG-1050) |

Operating Mode : C.V/C.C/C.R/C.P/C.C + C.V/C.R + C.V/C.P + C.C .
OHigh Precision, High Resolution (10 A),High Speed Variable Slew Rate (16A/us).
O Sequence Function for High Efficient Load Simulations.
-Parallel Connection of Inputs for Higher Capacity. (With 4 Booster Units : Max 9.45 kW or 4 Master Units)
Oxternal Channel Control/Monitoring via Analog Control Connector.
-Program Mode to Create Work Routines for Repetitive Tests.
OMultiple-Interface : USB 2.0 Device/Host and GP-IB/RS-232C.
Adjustable OPP/OCP/OVP Setting.

## LW Series

LW75-151QV7A
LW75-151DV7A
LW151-151DV7A
LW301-151SV7A
LW301-151SV7B
(150V/15A/75W 4Channel) Multi Channel
(150V/15A/75W 2Channel)
(150V/30A/150W 2Channel)
(150V/60A/300W 1Channel)
(150V/60A/300W 1Channel)

- Multi-channel \& individual control

Each channel is isolated and can be controlled individually.

- Low cost High performance

The CC, CR, CV, CP modes are standard.

- 4 points presetting

4 sets of frequently used value can be preset.

- Key lock

Key lock function provides to hold all setting values.

- Various remote controls (user option)

It is possible to add the interface function of GP-IB or USB after purchasing as user option.

- Front input terminal (A type only)

Maximum input current is 30 A .

- Maximum 12 channel in full rack size

## S-PL20

## Charge/Discharge Test with using regulated DC power supplies and Electronic Loads with ease

This software is a sequence program creator software for regulated DC power supplies and electric loads and most suitable for charge/discharge testing for secondary cells. Anyone can conduct setup, test and analysis easily.

- Language characters are selectable, Japanese, English and (Simplified / Traditional) Chinese. (Descriptions can be displayed with "HELP" window written in Japanese or English only.)

Max. 12ch Charge/Discharge systemThis software is compliant with 8 series of regulated DC power supplies and 3 series of electronic loads, and can control max. 12 sets of power supply and electronic load. (each power supplies and electronic loads must be same model. possible to control master-slave units.)

- TEST MODE functionA measuring sampling rate is changed depend on a number of channels or models of power supplies and electronic load. TEST MODE can check suitable sampling rate before testing.
- Creating sequence patterns with ease

It is easy to create new sequence patterns, to edit saved patterns, and to copy saved patterns.

- CSV test data, Graphical analyzing

All test data is saved as csv text data. Graphical analyzing function is available.
System Requirements
Microsoft Windows 10 (32bit/64bit)

## Regulated DC Power Supplies and Electronic Loads for ESCAS

- Regulated DC Power Supplies

PSF-L Series, PSF-H Series, PS-A Series, PU series, PDS-A series (with GP-IB or USB control borad option), PSW Series, PSU Series and PFR Series

PSF-L Series, PSF-H Series

PDS-A Series

LSA Series

## High rez Constant Voltage Regulated DC Power Supplies Unit

## M-6150 (5V/300mA 12ch, GP-IB) <br> M-6151 (5V/300mA 14ch, GP-IB)

This unit has 12 ch or 14 ch of $5 \mathrm{~V} / 300 \mathrm{~mA}$ CV power supplies as like Li-ion battery cell. Each channels are isolated electrically and can be operated in series connection (up to 600 V ). It can simulate batteries and is very useful for testing ECU and BMS (Battery management system).

- 12ch type (M-6150) and 14ch type (M-6151)

Setting resolution: 0.1 mV Measurement resolution: $0.1 \mathrm{mV} / 0.01 \mathrm{~mA}$
Remote sensing function is available for all channels

- Each channel can be operated independently.
- Channels and Units can be connected in series operation (up to 600V)
- Optional Application Software

An optional application software is available and it can control max. 8 units of M-6150/6151, edit sequence test patterns, monitor status, save logging data as csv text, and display chart (voltage/current).

- GP-IB/USB interface

GP-IB and USB interfaces are equipped as standard for setting output voltages for each channel, capturing output voltage/current data and so on.

- Various protection functions are availableOHP, OVP, OCP and CL

## BATTERY CELL SIMULATOR (for BCM)

## Multi Channel

Specifications
Output

| Output channels |  | 12ch/unit (M-6150), 14ch/unit (M-6151) |
| :---: | :---: | :---: |

## 250MS/s Digital Storage Oscilloscopes

## DCS-4605

(250MS/s 2ch 50MHz)

- Automatic measurement functions

19 kinds of automatic measurement functions are available and five parameters can be displayed on the LCD display at same time.

- Automatic calculation functions

Versatile calculation (,,$+- x$, FFT ) functions are available.

- Built-in memory

The DCS-4605 can memories front panel setting and wave forms data by themselves using the memory.

- Clear display

The DCS-4605 have a broad outlook 5.6 inch color LCD display (TFT) and LED back light.

- Support voltage and current probes

Enable to set measuring scales of voltage / current (vertical axis) at
from $\times 0.1$ to $\times 2000$ (1-2-5 steps) according to probes.

- Various trigger functions

Edge trigger, Video trigger and Pulse trigger functions are available.

- An "educational mode" function can be used in order to prevent a student from using an automatic calculation function.
- Application software; FreeWave

The software enables to control the DCS-4605 by PC (through USB). It can display wave forms on PC display in real time and save wave forms data as not only still picture but also motion picture by PC.

- Go-NoGo function

Data logger function (with using USB flush drive)

Color TFT LCD

## Specifications

| Model |  | DCS-4605 |
| :---: | :---: | :---: |
| Vertical axis |  |  |
| Sensibility |  | $2 \mathrm{mV} /$ div to $10 \mathrm{~V} /$ div ( $1-2-5$ steps) |
| Accuracy |  | $\pm(3 \% \times[$ eadout $]+0.1$ div $+1 \mathrm{mV})$ |
| Bandwidth(-3dB) | DC(AC)Coupling | DC (10Hz) to 50 MHz |
| Rise time |  | 7.Ons max |
| Input impedance |  | 1M $\pm \pm 2 \%$, Approx. 15 pF |
| Maximum input voltage |  | 300 V (DC + AC peak), Installation Category II |
| 20MHz bandwidth ( -3 dB ) function |  | Available |
| Trigger |  |  |
| Sources |  | CH1,CH2, LINE, EXT |
| Modes |  | AUTO, NORMAL, SINGLE, TV(Video), Edge, Pulse Width, Forcing |
| Coupling |  | AC, DC, Low/High Frequency rejection, Noise rejection |
| Trigger sensibility | 0.5 div ( $5 \mathrm{mV} \mathrm{min}$. ) | DC to 25 MHz |
| Ext. Trigger sensibility | 1.5 div ( 5 mV min.) | 25 MHz to 50 MHz |
| Horizontal axis |  |  |
| Range |  | $1 \mathrm{~ns} /$ div to $50 \mathrm{~s} / \mathrm{div}$, 1-2-5steps ( $50 \mathrm{~ms} /$ div to $50 \mathrm{~s} /$ div at Roll mode) |
| Modes |  | Main, Area magnification, Magnification, Roll, X-Y |
| Accuracy |  | $\pm 0.01 \%$ |
| Delay range | Pre-trigger | 10 div max. |
|  | Post-trigger | 1000div |
| Signal Acquisition System |  |  |
| Sample rate | Real-time | 250MS/s max. (1ch) |
|  | Equivalent | 25GSs/s max. |
| Vertical resolution |  | 8bits, 25levels/div |
| Record length |  | 4000 points |
| Acquisition modes |  | Normal, Peak Detect, Average |
| Peak detection |  | 10 ns ( $500 \mathrm{~ns} / \mathrm{div}$ to $50 \mathrm{~s} / \mathrm{div}$ ) |
| Average |  | 2, 4, 8, 16, 32, 64, 128, 256 |
| Cursors and Measurement |  |  |
| Automatic measurement functions | Vertical axis | Peak-to-peak, Max, Min, Amp, High, Low, Average, Rms Upper/Lower overshoot, Upper/Lower preshoot |
|  | Horizontal axis | Frequency, Period, Rise time, Fall time, Positive pulse width, Negative pulse width, Duty cycle |
| Cursors measurement |  | Voltage / Time difference between cursors ( $\mathrm{V}, \Delta \mathrm{T}, 1 / \Delta \mathrm{T}$ ) |
| Frequency counter |  | Resolution : six digits, Accuracy : $\pm 2 \%$ (cannot measure below two Hz ) |
| Interfaces |  |  |
| USB Host /USB Slave* |  | USB Flash Drive Max 32GB / USB 2.0 Full speed(USB-CDC) *Not support via USB3.0 or above |
| General |  |  |
| Power requirements |  | 100 V to 240 V AC, 47 Hz to 63 Hz |
| Power consumption |  | 18Watts, 40VA max |
| Dimensions |  | $341.5(\mathrm{~W}) \times 162.3$ (H) $\times 159$ (D) mm |
| Weight |  | Approx. 2.5 kg |
| Accessories |  | Probe $\times 2$, AC power cable, CD-ROM (instruction manual, APP software: FreeWave) |

## Electrical Safety Testers

STW-9901 (AC 5oova)/STW-9801 (AC 200VA) Withstanding Voltage Tester
STW-9902 (AC 500VA)/STW-9802 (AC 200VA) AC/DC Withstanding Voltage Tester
STW-9903 (AC 5oova)/STW-9803 (AC 200VA) AC/DC Withstanding Voltage/Insulation Resistance Tester
STW-9904 (ac 5ova)
AC/DC Withstanding Voltage/Insulation Resistance/Ground Bond Tester

500VA and AC Test Capacity
$240 \times 64$ Ice Blue Dot Matrix LCD

- Manual/Auto Mode
- Function Key for Quick Selecting
- High Intensity Flash for Caution \& Status Indication
- Safety Interlock Function

Zero Crossing Turn-on Operation

- Controllable Ramp-up Time

## STW-9900/9800 Series (stock only)

500VA and 200VA AC Test Capacity
Lem

- True RMS Current Measurement
- High Resolution : $1 \mu \mathrm{~A}$ for Measuring Current, 2 V for Setting Voltage

PWM Switching Amplifier to Enhance the Power Efficiency and Reliable Testing

- Max. 100 Memory Block for Test Condition (Step) Setting. And Each Step can be Named Individually
- Remote Terminal on the Front Panel for"Start"and"Stop" Control by External
- Interface: RS-232C, USB Devise, Signal I/O and GP-IB (Option: OPT.1)

## Multiplex Scanner Box for STW-9900/9800 Series

STW-S 1
8CH High Voltage Scanner Box
STW-S2
6 CH High Voltage and 2CH Ground Bond Scanner Box

This scanner box handles withstanding voltage $5 \mathrm{kVac} / 6 \mathrm{kVdc}$ and insulation resistance voltage 1 kVdc as well as the ground bond current 40Aac supplied from safety tester proper. Each scanner box extends the output to 8 channels, a potential $\mathrm{HI}, \mathrm{LO}$ or X can be set for each channel and AC/DC withstanding voltage, insulation resistance or ground bond test can be conducted depending on the model of scanner box.

A maximum 4 scanner boxes can be connected to one STW-9900/9800 series, it allows the output channel can be extended up to 32 channels. It is particularly well suited for multi-point safety testing as well for volume testing on factory floors.

## Arbitrary Function Generators

## FGX-2005 <br> 5MHz Arbitrary Function Generator

$0.1 \mathrm{~Hz} \sim 5 \mathrm{MHz}$ with in 0.1 Hz Resolution

- Sine, Square, Ramp, Noise and Arbitrary Waveform
- 20MSa/s Sampling Rate, 10 bit Vertical Resolution and 4k point Memory for Arbitrary Waveform
- 1\%~99\% Adjustable Duty Cycle for Square Waveform
- Waveform Parameter Setting Through Numeric Keypad Entry \& Knob Selection
- Amplitude, DC Offset and Other Key Setting Information Shown on the 3.5" LCD Screen Simultaneously

## Specifications

| Waveforms |  |  |
| :---: | :---: | :---: |
| Type |  | Sine, Square, Ramp, Noise, ARB |
| Arbitrary Functions |  |  |
|  | Sample Rate | $20 \mathrm{MSa} / \mathrm{s}$ |
|  | Repetition Rate | 10 MHz |
|  | Waveform Length | 4k points |
|  | Amplitude Resolution | 10 bits |
|  | Non-Volatile Memory | 4k points |
| Frequency Characteristics |  |  |
| Range | Sine | $0.1 \mathrm{~Hz} \sim 5 \mathrm{MHz}$ |
|  | Square | $0.1 \mathrm{~Hz} \sim 5 \mathrm{MHz}$ |
|  | Triangle, Ramp | 1 MHz |
| Resolution |  | 0.1 Hz |
| Accuracy | Stability | $\pm 20 \mathrm{ppm}$ |
|  | Aging | $\pm 1 \mathrm{ppm}$, per 1 year |
|  | Tolerance | $\leq 1 \mathrm{mHz}$ |
| Output Characteristios |  |  |
| Amplitude | Range | 1 mVpp to 10 Vpp (into $50 \Omega$ ) <br> 2 mVpp to 20 Vpp (open-circuit) |
|  | Accuracy | $\pm 2 \%$ of setting $\pm 1 \mathrm{mVpp}$ (at 1 kHz ) |
|  | Resolution | 1 mV or 3 digits |
|  | Flatness | $\begin{aligned} & \pm 1 \%(0.1 \mathrm{~dB}) \leq 100 \mathrm{kHz} \\ & \pm 3 \%(0.3 \mathrm{~dB}) \leq 5 \mathrm{MHz} \\ & \pm 5 \%(0.4 \mathrm{~dB}) \leq 12 \mathrm{MHz} \\ & \text { (sine wave relative to } 1 \mathrm{kHz} \text { ) } \end{aligned}$ |
|  | Units | Vpp, Vrms, dBm |
| Offset | Range | $\pm 5 \mathrm{Vpk}$ ac +dc (into $50 \Omega$ ) <br> $\pm 10 \mathrm{Vpk}$ ac +dc (Open circuit) |
|  | Accuracy | $2 \%$ of setting $+10 \mathrm{mV}+0.5 \%$ of amplitude |
| Waveform Output | Impedance | $50 \Omega$ typical (fixed) <br> $>300 \mathrm{k} \Omega$ (output disabled) |
|  | Attenuator | - |
|  | Protection | Short-circuit protected Overload relay automatically disables main output |
| SYNC Output | Level | TTL-compatible into >1k $\Omega$ |
|  | Impedance | $50 \Omega$ nominal |
|  | Fan Out | - |
|  | Rise of Fall Time | $\leq 25$ ns |
| Sine wave Characteristics |  |  |
|  | Harmonic distortion | $\begin{array}{\|lll} -55 \mathrm{dBc} & \mathrm{DC} \quad \sim 200 \mathrm{kHz}, \mathrm{Ampl}>0.1 \mathrm{Vpp} \\ -50 \mathrm{dBc} & 200 \mathrm{kHz} \sim 1 \mathrm{MHz}, \mathrm{Ampl}>0.1 \mathrm{Vpp} \\ -35 \mathrm{dBc} & 1 \mathrm{MHz} \sim 5 \mathrm{MHz}, \mathrm{Ampl}>0.1 \mathrm{Vpp} \\ -30 \mathrm{dBc} & 5 \mathrm{MHz} \sim 12 \mathrm{MHz}, \mathrm{Ampl}>0.1 \mathrm{Vpp} \\ \hline \end{array}$ |
| Square wave Characteristics |  |  |
|  | Rise/Fall Time | $\leq 25 \mathrm{~ns}$ at maximum output.(into $50 \Omega$ load) |
|  | Overshoot | < $5 \%$ |
|  | Asymmetry | $1 \%$ of period +1 ns |
|  | Variable duty Cycle | $\begin{aligned} & 1.0 \% \text { to } 99.0 \% \leq 100 \mathrm{kHz} \\ & 20.0 \% \text { to } 80.0 \% \leq 5 \mathrm{MHz} \\ & 40.0 \% \text { to } 60.0 \% \leq 10 \mathrm{MHz} \\ & 50 \% \leq 12 \mathrm{MHz} \end{aligned}$ |
| Ramp Characteristics |  |  |
|  | Linearity | < $0.1 \%$ of peak output |
|  | Variable Symmetry | 0\% to 100\% (0.1\% Resolution) |

## 50MHz Arbitrary Function Generator

## FGX-295

50MHz Arbitrary Function Generator

Output range up to 50 MHz for sine waveform and 25 MHz for square waveform.

- 5 standard waveform: Sine, Square, Ramp, Pulse and Noise

Arbitrary waveform function with 14 bits, 125 Mega sampling per sec.

- Flexible frequency sweep, burst waveform and modulation (AM, FM, PM, FSK and PWM) function.
- Standard equipment of USB, LAN and GP-IB

Standard equipment of a useful PC application

- Memorizes up to 4kinds of an arbitrary waveform with 256 points.

Specifications

| Output waveform |  |  |  |
| :---: | :---: | :---: | :---: |
| Standard | Sine, Square, Ramp, Triangle, Pulse, Noise, DC |  |  |
| Incorporated arbitrary | Exponential rise, Exponential fall, Reverse ramp, Sinc, Heart Pulse |  |  |
| Waveform characteristics |  |  |  |
| Sine | Frequency | $1 \mu \mathrm{~Hz}$ to 50 MHz |  |
| Square | Frequency | $1 \mu \mathrm{~Hz}$ to 25 MHz |  |
| Ramp, Triangle | Frequency | $1 \mu \mathrm{~Hz}$ to 200 kHz |  |
| Pulse | Frequency | $500 \mu \mathrm{~Hz}$ to 10 MHz |  |
| Noise | Bandwidth | approx. 20 MHz |  |
| Arbitrary | Frequency | $1 \mu \mathrm{~Hz}$ to 10 MHz |  |
|  | Waveform length | 2 K to 256 K points |  |
|  | Amplitude resolution | 14bits (including marks) |  |
|  | Sampling rate | 125MS/s |  |
| Common characteristics |  |  |  |
| Frequency | Resolution | $1 \mu \mathrm{~Hz}$ |  |
| Amplitude | Range | $50 \Omega$ termination | 10 mV (p-p) to 10 V (p-p) |
| DC offset, DC | Range (peak AC+DC) | $50 \Omega$ termination | $\pm 5 \mathrm{~V}$ (p-p) |
| Main output | Impedance | Approx. $50 \Omega$ |  |
| Sync output | Level | TTL (Impedance : approx. 50, |  |
| Internal frequency standard | Accuracy | $\pm 10 \mathrm{ppm}$ (90days) | $\pm 20 \mathrm{ppm}$ (1year) |
| External frequency standard (input) | Lock range | $10 \mathrm{MHz} \pm 500 \mathrm{~Hz}$ |  |
|  | Level | 100 mV (p-p) to 5 V (p-p) |  |
| External frequency standard (output) | Lock range | 10 MHz |  |
|  | Level | approx. 632 mV (p-p) (0dBm) |  |
| Phase offset | Range | -360 degree to +360 degree |  |
|  | Resolution | 0.001 degree |  |
| Modulation |  |  |  |
|  | Internal modulation | Sine, Square, Ramp, Triangle, Noise, Arbitrary |  |
|  | Frequency(Internal) | 2 mHz to 20 kHz |  |
| AM | Modulation | 0.0\% to 120.0\% |  |
| FM | Deviation | DC to 25 MHz |  |
| PM | Deviation | 0.0 degree to 360 degree |  |
| PWM | Deviation | 0.0 degree to 360 degree |  |
| FSK | Internal modulation | duty cycle $50 \%$ square |  |
|  | Frequency(Internal) | 2 mHz to 100 kHz |  |
| External modulation input | Voltage range | $\pm 5 \mathrm{~V}$ full scale |  |
|  | Input resistance | approx. 8.7k $\Omega$ |  |
|  | Bandwidth | DC to 20kHz |  |
| Sweep | Waveform | Sine, Square, Ramp, Arbitrary |  |
|  | Sweep time | 1 ms to 500 second |  |
| Burst | Waveform | Sine, Square, Ramp, Triangle, Noise, Arbitrary |  |
|  | Start/Stop, Phase | -360 degree to +360 degree |  |
|  | Internal period | $1 \mu$ to 500 second |  |

## - Application Software "WAVEPATT"

This application software enables to create on the PC, an arbitrary waveform that outputs from FGX-295. The created waveform is to be transmitted to FGX-295 through GP-IB, LAN or USB.

$\underset{\text { STANDARD }}{\text { GP-IE }}$
DL-2060VR
Digital Multimeter
(With USB/RS-232C function)
USEB
DL-2060 (With UsB function)
Digital Multimeter
$\mathrm{US} \mathbf{8}$
STANDARD

- Tricolor Vacuum Fluorescent Display (VFD)

High resolution of $5 \times 7$-dot matrix tricolor (red, yellow, white) display shows measurement values with measuring units in upper part and for measurement range in lower part simultaneously.

- Upper and Lower Limit Level Function

Automatic judgment of measurement adequacy in accordance with setting range from the points of upper/lower limit. If judged false, the unit beeps and displays a message "HI" or "LO".
Deactivating USB interface setting, a pulse signal generated by limit test is transmitted through the USB terminal to the external device directly.
USB and GP-IB (GP-IB is equipped with DL-2060G only) interface USB interface as standard equipment. The DL-2060G is equipped with both GP-IB and USB interface. Digital multimeter is controlled by SCPI command.

## DL-2060 Series

High Resolution LabVIEW C

Limited sales area:China, Korea, Singapore, Malaysia, Thailand, Vietnam

- Multipoint Scanner Card up to 20 channels

With an optional multipoint scanner card OP-42 (OP-41), different input signals up to 20 (10) channels can be automatically changed for measurement. Scanning channels, scanning times and scanning intervals are selectable. The unit can be installed by users easily. (DC voltage, AC voltage, resistance, frequency, cycle can be measured by OP-42 and OP-41)

- Useful Application Software

The application software (DL-TOOL \& DL-LINK) attached to the DL-2060 / DL-2060G can control panel setting and send measured data to Microsoft Excel and Word.

Frequency and Period Characteristics *5

## Specifications

DC Voltage

| Range | Resolution | Full Scale | $\begin{gathered} \text { Accuracy } \\ \left(1 \text { year } 23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}\right. \text { ) } \\ \hline \end{gathered}$ | Input Resistance |
| :---: | :---: | :---: | :---: | :---: |
| 500 mV | 10uV | 510 | 0.02\%+4 | $10 \mathrm{M} \Omega$ or $>10 \mathrm{G} \Omega$ |
| 5 V | 100uV | 5.1 |  | $10 \mathrm{M} \Omega$ or $>10 \mathrm{G} \Omega$ |
| 50 V | 1 mV | 51 |  | $11.1 \mathrm{M} \Omega$ |
| 500 V | 10 mV | 510 |  | $10.1 \mathrm{M} \Omega$ |
| 1000 V | 100 mV | 1020 |  | $10 \mathrm{M} \Omega$ |

- When the input value exceeds the full scale of the selected range, the display will show-OL- (over load) on the display.
- The specifications are guaranteed to an input voltage of 1000 V . A beeping alarm will go off when the input voltage is higher than 1000 V . 1000 V protection of 1000 V peak on all ranges.
DC Common Mode Rejection Ratio $>90 \mathrm{~dB}$ at $\mathrm{dc}, 50$ or $6 \mathrm{~Hz} \pm 0.1 \%$ ( $1 \mathrm{k} \Omega$ unbalanced, slow rates)
DC Current

| Range | Resolution | Full Scale | Accuracy <br> $\left(1\right.$ year $\left.23^{\circ} \mathrm{C}+5^{\circ} \mathrm{C}\right)$ | Shunt <br> Resistance | Burden Voltage |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 500 uA | 10 nA | 510 | $0.05 \%+5$ | $100 \Omega$ | 0.06 V max |
| 5 mA | 100 nA | 5.1 | $0.05 \%+4$ | $100 \Omega$ | 0.6 V max |
| 50 mA | 1 uA | 51 | $0.05 \%+4$ | $1 \Omega$ | 0.14 V max |
| 500 mA | 10 uA | 510 | $0.10 \%+4$ | $1 \Omega$ | 1.4 V max |
| 5 A | 100 uA | 5.1 | $0.25 \%+5$ | $10 \mathrm{~m} \Omega$ | 0.5 V max |
| 10 A | 1 mA | 12 | $0.25 \%+5$ | $10 \mathrm{~m} \Omega$ | 0.8 V max |
| . |  |  |  |  |  |

$\cdot 500 u \mathrm{~A} \sim 500 \mathrm{~mA}$ range has a 3.6 V voltage limit protection and 0.5 A fuse protection. And 10 A range has a 12 A fuse protection.

- When the input value exceeds the full scale of the selected range, the display will show -OL- (over load) on the display.
-The specifications are guaranteed to an input of 10 A . A beeping alarm will go off when the input value is higher than 10 A .
AC Voltage, $\mathrm{ACV}+\mathrm{DCV}^{131}$ (AC Coupled)

| Range | Resolution | Full Scale | Accuracy ( 1 year $23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}$ ) |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $30 \mathrm{~Hz}-50 \mathrm{~Hz}$ | $50 \mathrm{~Hz}-10 \mathrm{kHz}$ | $10 \mathrm{kHz}-30 \mathrm{kHz}$ | $30 \mathrm{kHz}-100 \mathrm{kHz}$ |
| 500 mV | 10 uV | 510 | $1.00 \%+40$ | $0.50 \%+40$ | $2.00 \%+60$ | $3.00 \%+120$ |
| 5 V | 100 uV | 5.1 | $1.00 \%+20$ | $0.35 \%+15$ | $1.00 \%+20$ | $3.00 \%+50$ |
| 50 V | 1 mV | 51 | $1.00 \%+20$ | $0.35 \%+15$ | $1.00 \%+20$ | $3.00 \%+50$ |
| 500 V | 10 mV | 510 | x | $0.5 \%+15$ | $1.00 \%+20^{[2]}$ | $3.00 \%+50^{[2]}$ |
| 750 V | 100 mV | 765 | x | $0.5 \%+15$ | x | x |

## [1] Specifications are for sine wave inputs that are greater than $5 \%$ range. [2]lnput voltage $<300 \mathrm{~V}$. <br> [2] lnput voltage $<300 \mathrm{Vrms}$.

[3]The accuracy of ACV+DCV is equal to ACV's with 10 more digits added.

- The specifications are guaranteed to an input of 750 V . A beeping alarm will $g o$ off when the input value is higher than 750 V
- Input protection of 1000 V peak on all ranges.
- AC-coupled true RMS - measures the AC component of the input with up to 400 Vdc of bias on any range.
- AC Common Mode Rejection Ratio $>60 \mathrm{~dB}, 50$ or $6 \mathrm{~Hz} \pm 0.1 \%$ ( 1 k ) unbalanced, slow rates)

AC Current, ACI+DCI ${ }^{[3]}$ (AC Coupled)

| Range | Resolu-tion | Full Scale | Accuracy (1 year $23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}$ ) [1] |  |  |  | Burden Voltage |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | $30 \mathrm{~Hz}-50 \mathrm{~Hz}$ | $50 \mathrm{~Hz}-2 \mathrm{kHz}$ | $2 \mathrm{kHz}-5 \mathrm{kHz}$ | $5 \mathrm{kHz}-20 \mathrm{kHz}$ |  |
| 500uA | 10nA | 510 | 1.50\%+50 | 0.50\%+40 | 1.50\%+50 | 3.00\%+75 | 0.06 V max |

[^3] standard test leads.

- Open circuit voltage approximates 6 V max on $500 \Omega \sim 5 \mathrm{M} \Omega$ range, approximates 5.5 V max on $50 \mathrm{M} \Omega$ range.
- Input protection of 500Vpeak on all ranges.

Capacitance

| Range | Resolution | Full Scale | Test Current | Accuracy <br> $\left(1\right.$ year $\left.23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}\right)$ |
| :---: | :---: | :---: | :---: | :---: |
| $5 \mathrm{nF}: 0.5 \mathrm{nF} \sim 1 \mathrm{nF}^{[2]}$ | 0.001 nF | 5.1 | 8.3 uA | $2.0 \%+20$ |
| $5 \mathrm{nF}: 1 \mathrm{nF} \sim 5 \mathrm{nF}^{2]}$ |  |  |  | $2.0 \%+10$ |
| $50 \mathrm{nF}: 5 \mathrm{nF} \mathrm{\sim 10nn}^{[2]}$ | 0.01 nF | 51 | 8.3 uA | $2.0 \%+30$ |
| $50 \mathrm{nF}: 10 \mathrm{nF} \sim 50 \mathrm{nF}^{[2]}$ |  |  |  | $2.0 \%+10$ |
| 500 nF | 0.1 nF | 510 | 83 uA | $2.0 \%+4$ |
| 5 nF | 1 nF | 5.1 | 0.56 mA |  |
| 50 uF | 10 nF | 51 | 0.83 mA |  |

[1] For the $5 \mathrm{nF} \sim 50$ uF range make sure that the input is greater than $10 \%$ of the range.
[2] Need to use the REL function.

- Input protection of 500 V peak on all ranges.

## Frequency

| Measurement Range | Accuracy $\left(1\right.$ year $\left.23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}\right)$ |
| :---: | :---: |
| $10 \mathrm{~Hz} \sim 500 \mathrm{~Hz}$ | $0.01 \%+5$ |
| $500 \mathrm{~Hz} \sim 500 \mathrm{KHz}$ | $0.01 \%+3$ |
| $500 \mathrm{KHz} \sim 1 \mathrm{MHz}$ | $0.01 \%+5$ |

$A C+D C$ measurements do not allow frequency measurements.

- Input protection of 1000 V peak on all ranges.

Temperature Specifications (DL-2142 Only)

| Sensor | Type | $\qquad$ | Resolution | $\begin{gathered} \text { Accuracy } \\ \left(1 \text { year } 23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}\right) \\ \hline \end{gathered}$ |

| Connection kit for parallel operation | OP-21A | PSF-L | Horizontal installation for 2sets |
|  | OP-21B |  | Vertical installation for 2sets |
| GP-IB cable | CB-2420P | approx. 2m |  |
| USB cable | GTL-246 |  | A-B |

## Accessory \& Option Parts for Power Supplies and Electronic Loads

Rack Mount Adapter Option List

| Intended model | Rack mount \& Adapter/ Rack clamp | Rack mount clamp (Fixing attachement) |  | Blank panel |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Model | Model | Remarks | Model | Width |
| For PA-B seriese | RM-608J (JIS) <br> RM-608E (EIA) | RJ-608-PA | for 2 units | RB-608A <br> RB-608B <br> RB-608C <br> RB-608D <br> RB-608E | $\begin{aligned} & 1 / 2 \\ & 1 / 3 \\ & 1 / 4 \\ & 1 / 6 \\ & 1 / 12 \end{aligned}$ |
| For PW-A, PAR-A \& LW seriese |  | RJ-608-PW | for 3 units |  |  |
| For GP-600B |  | RJ-608-GP | for 1 unit |  |  |
| For PSF-L/H seriese |  | RJ-608-1/2 | For $1 / 2$ rack width |  |  |
| For PS-A, PDS-A series |  | $\begin{aligned} & \text { RJ-608-1/2 } \\ & \text { RJ-608-1/3 } \end{aligned}$ | For $1 / 2$ rack width For $1 / 3$ rack width |  |  |
| For LSA-165/165V1/330 |  | RJ-608-1/3 | For $1 / 3$ rack width |  |  |
| For LSA-1000 |  | RJ-608-1/2 (2pcs) | For 1/2 rack width | - | - |
| For PSW series | GRA-410-J (JIS) GRA-410-E (EIA) | Enclosed in GRA-410-J/E |  | Enclosed in GRA-410-J/E |  |
| For LSG-2100S | GRA-413 | Enclosed in GRA-413 |  | - | - |
| For LSG-175/350/1050 | GRA-414-J (JIS) GRA-414-E (EIA) | Enclosed in GRA-414-J/E |  | Enclosed in rack mount adapter |  |
| For STW-99/98 | GRA-417 | Enclosed in GRA-417 |  | - |  |

- PA-B/PW-A/PAR-A/LW series and GP-600B

L_ RJ-608-PA $\quad$ -

PW-A series
PAR-A series
LW series
All models:1/3 rack width
 attachments for 2 units instal lation and RJ-608-PW includes attachments for 3 units installation.

- PSF/PS-A/PDS-A/LSA series (with using RJ-608-1/3, 1/2)

| Seires | $1 / 6$ | $1 / 3$ | $1 / 2$ | $1 / 1$ |
| :--- | :---: | :---: | :---: | :---: |
| PS-A | $\bigcirc$ | $\bigcirc$ | $\bigcirc$ |  |
| PDS-A |  | $\bigcirc$ | $\bigcirc$ |  |
| PSF-L |  |  | $\bigcirc$ |  |
| PSF-H |  |  | $\bigcirc$ |  |
| LSA |  | $\bigcirc$ |  | $\bigcirc$ |

L_ RJ-608-1/2

Brank panels
RB-608A $1 / 2$
RB-608B $1 / 3$
RB-608C 1/4
RB-608D $1 / 6$
RB-608E $\quad 1 / 12$
These series use fixing attachments, RJ-608-1/3 or RJ-608-1/2.
RJ-608-1/3 can fix $1 / 3$ rack width unit or $1 / 6$ rack width unit ( 1 or 2 units). RJ-608-1/2 can fix $1 / 2$ rack width unit, $1 / 3$ rack width unit or $1 / 6$ width unit (up to 3 units). Rack mount width unit (LSA-1000) needs two sets of RJ-608-1/2 for fixing.
Five kinds of brank panels are available so that various units can be mounted.

Probes List

| Model | Attenuator | Applied capacity | Input impedance ${ }^{* 1}$ | Bandwidth | Rise time | Max input voltage | Read out | Oscilloscopes/Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| GTP-350A-2 | $\times 10$ | $10 \sim 25 \mathrm{pF}$ | 10M $\Omega$ /approx.13pF | 350 MHz | 1 ns | $500 \mathrm{~V}^{* 3}$ | - |  |
|  | $\times 1$ | - | $1 \mathrm{M} \Omega$ / a +approx.46pF*2 | 6 MHz | 58ns | $300 V^{* 4}$ | - |  |
| GTP-250B-2 | $\times 10$ | $10 \sim 35 \mathrm{pF}$ | $10 \mathrm{M} \Omega$ /approx.17pF | 250 MHz | 1.4 ns | $500 V^{* 3}$ | - |  |

For details of information, please ask the following dealer.

[^0]:    Parallel connection kit, OP-21A (for holizontal installation) / OP-21B (for vartical installation) includes a Bus bar, OP-22P and JK-10.

    * PSF-H series can not connect a Bus bar because the output terminals are different from PSF-L series output terminals in shape.

[^1]:    * Dimensions (Max. Dimensions) W $\times \mathrm{H} \times \mathrm{D}(\mathrm{mm})$

    Type I : $70 \times 124(139.5) \times 364(415.5)$
    Type II: $140 \times 124(139.5) \times 364(415.5)$
    Type III: $210 \times 124(139.5) \times 364(415.5)$

[^2]:    * 1: 0.5 mVrms for the channels of $\pm 24 \mathrm{~V}$ or les

[^3]:    [1] Using the REL function. If you don't use the REL function then increase the error by $0.2 \Omega$.
    [2] When measuring resistances greater than $500 \mathrm{k} \Omega$, please use shielded test leads to eliminate the noise interference that may be induced by
